

## Practical Information

### About Kobe

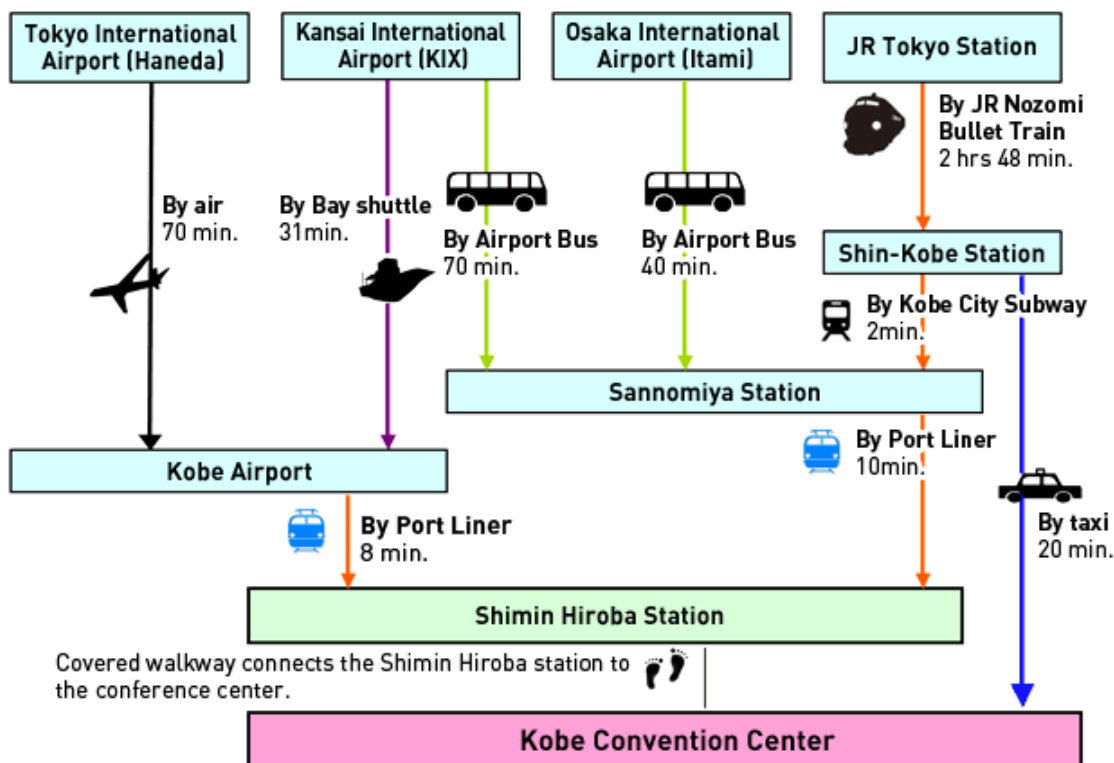

Nestled between the mountains and the sea, Kobe is a modern urban center set amidst a rich natural environment, located in Kansai, the southern-central region of Japan's main island, Honshu. It is the capital city of Hyogo Prefecture, and has a long history as an international port city, having developed as a gateway for goods and people from overseas. Kobe is near Japan's most well-known historical treasures in Kyoto, Nara, and Himeji, as well as just 40 km from Osaka, the nation's second largest metropolis.

### Kobe Convention Center: Conference Venue

The Kobe Convention Center was built as the central site of the convention facilities in Portopia, a manmade island and the world's first offshore cultural city, easily accessible by train, car, or by air.
